Waterite

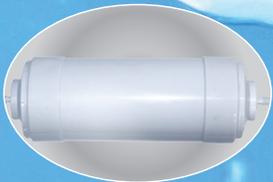

VECTAPURE 400 NX™

The all-new VECTAPURE 400NX™ residential RO drinking water system demonstrates breakthrough RO technology. The reliability and superior performance you have come to expect from Waterite's legendary VECTAPURE and VECTAPURE NX™ systems has just become better! VECTAPURE 400NX™ systems feature an easy-change fully encapsulated 400GPD membrane, 1:1 product to waste ratio for a simpler, efficient operation. Its streamlined design makes installation a snap!

THIS REVERSE OSMOSIS WATER SYSTEM IS DESIGNED ONLY TO IMPROVE AESTHETIC PROPERTIES AND IS NOT DESIGNED TO ACT AS A PRIMARY BARRIER TO WATERBORNE MICROBIOLOGICAL OR TOXIC CHEMICAL CONTAMINATION. WHERE THESE CONDITIONS MAY EXIST CONSULT A WATER PROFESSIONAL TO ENSURE SUFFICIENT RAW WATER PRE-TREATMENT AND DISINFECTION.

The system includes:

- 400 gallon-per-day system with manifold integrated filter housing
- 3 carbon and spun polypropylene pre-filter cartridges
- All necessary installation tubing and hardware
- Hygienic all-plastic water storage tank
- Chrome designer faucet
- Limited one-year warranty with optional extension
- Module to replace membrane during sanitizing procedure
- Leak Stop and shock arrestor for added security
- Optional TDS monitor
